

ISO 9001:2008 Certified,
ITAR Registered, Veteran Owned

Program Preparation & Options

- A pre-training survey of participants will be conducted allowing customized focus for specific needs.
- All participants are encouraged to send challenging or typical substrates for pre-event testing, on-press demonstration, and classroom discussion.
- Participating companies are also encouraged to send existing tooling for on-press demonstration and classroom discussion.
- Tailored “company specific” training events are also available and quoted upon request.

Tooling and Converting Workshops & Clinics

“TEAMWORK IS THE KEY TO SUCCESS.”

LEARNING OBJECTIVES:

- Gain knowledge of tooling and the “important variables” which impact tooling solutions
- Expanding your knowledge of current tooling options: Conventional through Hybrid
- “Primary Influencers” “you must know” prior to requesting a tooling solution
- Gain a greater understanding of Tooling and Converting parameters
- “Game changers“ ”you must consider” before choosing best converting method: Die Cutting, Laser Cutting, NC Knife & Router Cutting, Water Jet Cutting, Rotary Cutting, etc.
- On-press training of best methods and techniques for die cutting a wide variety of substrates
- Identifying and resolving your most common converting challenges

WHO SHOULD ATTEND:

- Engineers: Process, Manufacturing, Product Development & Quality
- Operations: Die Cutting and Finishing Personnel, Press Operators, Production Managers, & Operations Managers
- Administrative: Job Planners, Estimators, Designers, Buyers & Sales

ATTEND IF YOU ARE LOOKING FOR ANSWERS TO THESE COMPELLING QUESTIONS:

- When choosing a converting method, how can we be sure the solution will be profitable for our company?
- When choosing a tooling solution, how can we be certain it will produce parts that will meet our customer’s specifications?
- When determining how best to convert a material, who can we lean on for the advice needed to give our company a competitive advantage?
- When our job plan isn’t going as well as expected, who can we lean on for technical and trouble shooting advice?
- Are our press set-up methods and running techniques as good as they can be?
- Does - how I manage my die cutting - impact the quality of the finished part we are delivering to our customer?

MATHIAS BIO:

- Mathias Die Company has been an industry leading producer of tooling and converting solutions for over 45 years. We manufacture a comprehensive line of tooling and provide engineer supported converting solutions through to production. Including; early stage product development, process and part validation, and converting method integration. The “Mathias Tooling/ Converting Clinic and Workshop” has created a platform, rooted in experience, with detailed training for improving the tooling and converting knowledge and abilities of our client base. Our Workshops also provide your team the opportunity to introduce tooling & converting challenges in need of solutions. Mathias proudly welcomes you to attend our Workshops & Clinics. We remain committed to improving production converting operations, results, and efficiencies that meet your company’s growth objectives.
